Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,714,195 to Shiba et al (Shiba). Shiba discloses a method of repairing defects in a color filter comprising the steps of removing a portion of a filter element having a foreign substance therein by utilizing a laser beam, and discharging a hardening resin containing a dye or pigment from an ink-jet head onto the portion from which the foreign substance has been removed. See the abstract, column 11, line 61 to column 12, line 9, and Figures 10A-10D. The ink jet head comprises a TV camera for testing the color filter to detect defects in filter elements, whereby the X-Y coordinates of the detected defects are stored in a memory for correction. See column 11, lines 10-15. In one embodiment, Shiba discloses that the laser repair apparatus includes a testing function. See column 11, lines 10-15 and path (a) of Figure 11. However, Shiba does not explicitly disclose providing the laser irradiation unit and the ink jet unit together in the same apparatus. It would have been obvious to one skilled in the requisite art to combine the laser and the ink jet head together in a single apparatus, because it is taught that the ink jet unit is provided with a camera for detecting defects (i.e. for providing a testing function), and in one embodiment a testing function is provided to the

laser repair apparatus, therefore combining the ink jet unit and the laser together in the same apparatus would allow for the sharing of a single camera as both the camera on the ink jet head and as the element providing a testing function to the repair apparatus, as well as additionally providing the benefit of only requiring a single X-Y table.

Allowable Subject Matter

2. Claims 2-4 are allowed.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
